SUMMARY

Software Engineer with more than 6 years of experience in full-stack development, system architecture, and project management. Skilled in Python, Java, PHP, JavaScript, and database management, delivering scalable and secure web solutions for diverse industries.

WORK EXPERIENCE

Software Engineer, TripUp

2023 - Present

- Developed Secure Order Management System.
- Led the design and deployment of a scalable invoicing system, incorporating facial recognition and ID verification, enhancing security and validation.
- Implemented and managed CI/CD pipelines, reducing deployment time and improving code quality.

Software Engineer, Travela

2021 - 2022

- Implemented security protocols, including encryption and authentication, to safeguard data integrity.
- Orchestrated containerized applications using Docker and Kubernetes, enhancing deployment efficiency.

Full Stack Web Developer, NSU Association for Computing Machinery SC

2019 - 2021

- Managed a team of developers to execute front-end and back-end tasks, ensuring timely delivery of high-quality web solutions.
- Designed a full-fledged interview scheduling system allowing candidates to book interviews, with interviewers accessing responses and making final decisions

Full Stack Web Developer, Dhaka Chemicals

2018 - 2020

- Built the entire site in a Linux-Apache-MySQL-PHP (LAMP) environment.
- Achieved a GTmetrix page loading speed of 1.2 seconds and a performance score of 97% (Last tested in 2019)

Software Developer, Liquor Lounge

2017 - 2019

- Developed a Point of Sale (POS) application, enabling efficient sales and inventory management with a touch-friendly user interface
-

PROJECT

2024

TweeBot (An Artificial Intelligent Social Media Agent)
